SUMMARY

Computer Science student (CGPA 4.80/5.00) and backend developer who builds and ships complete products, from database and API to the page the user clicks. Most recent build: **SABAGeo**, a live Web-GIS land registry that detects overlapping land parcels with PostGIS and anchors records on the Polygon blockchain. Comfortable with Python, Django, Flask, PostgreSQL and JavaScript, with a research background in data analysis. Looking for backend, software engineering or data roles, remote or on-site.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), SQL, HTML5, CSS3
Backend: Django, Django REST Framework, Flask, FastAPI, REST APIs, authentication, OOP
Databases & GIS: PostgreSQL, PostGIS, SQLite, MySQL, MongoDB, Leaflet, WGS84/UTM coordinates
Deployment & tools: Git, GitHub, Render, Neon, Gunicorn, environment variables, Postman, VS Code, PyCharm
Other: Polygon blockchain anchoring, data analysis (pandas, SPSS), graphic design, video editing (Premiere Pro)

EXPERIENCE

Freelance Software Developer Jan 2023 – Present
Self-employed | Remote

- Design, build and deploy websites and web apps for students, student associations and small businesses, from first brief to launch.
- Built the live quiz-competition platform used by **NUESA (University of Ibadan, UI-FCES chapter)** for academic contests.
- Produced a 60-second AI-generated YouTube advert for **Coizo**, a multi-asset trading platform, through an agency referral.
- Handle hosting, domains, basic SEO and post-launch updates for client sites.

Backend Developer Intern Apr 2025 – Oct 2025
Federal College of Education (Special), Oyo, Oyo State

- Developed Python backend features for the college's education management systems.
- Wrote and tested REST API endpoints and worked with the frontend team to connect them.
- Helped design database schemas and took part in code reviews and technical documentation.

PROJECTS

SABAGeo — Web-GIS Land Registry | Live site 2026
Python, PostgreSQL + PostGIS, Neon, Leaflet, Polygon PoS, Render

- Built and deployed a live land registry that checks every new land parcel against all registered plots using **PostGIS** spatial queries, showing a clear pass or overlap flag on a satellite map.
- Anchored each registration on the **Polygon** blockchain (Amoy testnet) and kept a tamper-evident hash-chain ledger.
- Shipped a searchable registry, printable parcel reports (area, perimeter, map), CSV and beacon-photo upload, and coordinates in lat/long or UTM zones 31–33.
- Added client accounts with access-code login, verifiable payment receipts and a self-service "Register New Plot" flow.

QuantumTasker — Task Management App
Python, Django, JavaScript, Gunicorn

- Built a task-management web app with user authentication, a structured Django backend and API endpoints for the interface.
- Configured it for deployment with Gunicorn and environment variables, and fixed deployment issues along the way.

Vendigo Food — Campus Food Ordering Platform
Django, Django REST Framework, PostgreSQL

- Contributed to planning and backend development of a multi-role platform for customers, vendors, riders and admins, including payment and notification flows.

Codex Bank — Banking Application | GitHub
Python, OOP, Tkinter, JSON

- Banking app with savings and checking account classes, deposits, withdrawals and transaction history, saved to JSON with input validation.

NUESA Quiz Competition Platform | Live demo
JavaScript, HTML, CSS

- Timed quiz system used in live university contests, with per-contestant scoring, on-the-fly question management and a big-screen mode.

EDUCATION

B.Sc. Computer Science — Nigerian Army University, Biu (NAUB) 2025 – Present

- CGPA 4.80 / 5.00 | GPA 5.00 in second semester

Primary & Secondary Education — Lord's Secondary School, Oyo State 2008 – 2024

CERTIFICATIONS

- **Scientific Computing with Python** — freeCodeCamp (verify)
- **Responsive Web Design** — freeCodeCamp (verify)
- **Python Essentials 1** — Cisco Networking Academy
- **Python Essentials 2** — Cisco Networking Academy
